**To whom it may concern,**

I am writing to provide a recommendation for Mr. Umay Şamlı, a student who has recently completed the course "Theory of Computation" under my instruction at TED University. It is with great pleasure that I recommend Umay for any future academic or professional endeavors.

Throughout the duration of the course, Umay consistently demonstrated exceptional knowledge and aptitude in the field of theoretical computer science. Strong theoretical foundation, analytical skills, and problem-solving abilities he holds were performance-wise evident on assignments and examinations. Umay achieved good results, displaying a deep understanding of the subject matter and a remarkable ability to apply theoretical concepts to practical scenarios.

Beyond his technical prowess, I was particularly impressed by Umay's engagement with the philosophical and ethical aspects. He possesses an ability to integrate philosophy of ethics into academic pursuits, enriching the learning environment and stimulating meaningful discussions among his peers. His thoughtfulness and introspection contributed to the intellectual atmosphere of the class.

Umay retains a strong work ethic, maintaining a high level of dedication and commitment to his studies. He sought out additional resources and went beyond the required course material to expand his knowledge in the field. Umay's inquisitive nature and passion for learning were obvious both inside and outside the classroom.

Furthermore, he has excellent communication skills. He has been actively participating in (and out) class discussions, showing the ability to articulate complex ideas with clarity and precision which fosters a collaborative and inclusive environment, inspiring their peers to engage in meaningful discourse and exchange of ideas.

Based on Umay's academic achievements, intellectual acuity, and personal attributes, I firmly believe that he has the potential to excel in any academic or professional pursuit related to theoretical computer science or philosophy of ethics. Umay's combination of theoretical and spiritual skills makes him a unique and valuable asset to any team or organization he could become a part of.

I highly recommend Mr. Şamlı without reservation. He possess the necessary skills, intellectual capacity, and personal qualities to thrive in any challenging academic or professional environment. I have no doubt that Umay will continue to make significant contributions to the chosen field and positively impact any institution he is affiliated with.

Please do not hesitate to contact me at "burak.ekici@cs.ox.ac.uk" for further inquiries.

Sincerely,

Dr. Burak Ekici
